

Goudkleurige oorbellen met facetkralen en zoetwater parels

Deze goudkleurige oorbellen zijn gemaakt van Franse oorbelhaken met daaraan gehangen een zoetwater parel, een kleine gouden ster en facetkralen.

Inspiration: 13980

1.

Cut a piece of 0.6mm brass wire measuring approx. 20cm. Bend the wire in half and thread it through the loop of the small star. Now twist the wire a couple of times to secure.

2.

Thread four faceted beads onto each of the two brass wires. Now assemble them by twisting one wire around the other. NB: Cut off the wire that was used for twisting around the other wire. Do not cut off the other wire.

3.

Thread a freshwater pearl onto the remaining wire.

4.

Thread the wire through the loop of the French earwire. You may use flat nose pliers for this process. Bend backwards and twist the wire around itself. Finally trim the excess wire.
