

Een gevlochten armband gemaakt van leerkoord en facetkralen

v13931

Deze armband is gemaakt van 2 mm dik zilverkleurig leerkoord en 1 mm macramé koord. De facetkralen zijn geregen op het macramé koord. Een magnetische sluiting is gebruikt om de armband te sluiten.

Hoe werkt het

1. Cut two 70cm pieces of 2mm leather cord and a 40cm piece of 1mm macramé cord. Secure all three cords in the clip at the top of the clip board as shown.

2. Make two braiding knots with the two leather cords around the macramé cord in the middle.

3. Thread approx. 12 faceted beads onto the macramé cord before attaching the other end of the macramé cord onto the clip board with a clip at the bottom of the clip board.

4. Braid until a desired length is reached – excluding the fastener. See “Jewellery School”, idea No. 12499 on our website for further instructions.

5. Trim both ends of the bracelet and glue each end into the two-part magnetic clasp. Leave to dry.
