

## Harten van papieren vlechtstroken

Elke hangende decoratie is gemaakt van papieren vlechtstroken die in een hartvorm gevouwen zijn en vervolgens aan elkaar geniet.

**Inspiration: 13907**

### 1.

Use five paper star strip to make one heart. The paper star strips are already folded in half. Start with one paper star strip which will serve as the handle. The fold should be at the top. Now place another four paper star strips – two on each side – against the first paper star strip. Make sure that the fold is pointing downwards.

### 2.

Staple the five paper star strips together with a stapler.

**3.**

There are now two paper star strips on each side of the middle paper star strip. These are sticking upwards. Bend the ends from the two paper star strips on each side downwards, slightly staggered (the shape of the heart is now taking place).

**4.**

Staple together all the paper star strips.

**5.**

Trim the excess paper star strip.

**6.**

Make a hole in the handle at the top. Use revolving punch pliers.

**7.**

Insert a piece of paper cord through the hole.
