

Kerstdecoratie om zelf te maken

v10541

Hoe werkt het

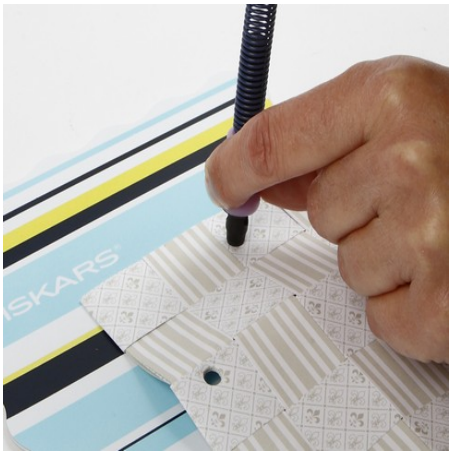

1
Weave a base using 8 x 8 paper strips. For a basket measuring 11 x 11 cm use the wide paper strips.

2
Glue as shown in the photo and cut off excess strips.

3
Fold along the two outer layers of all four lengths.

4
Punch holes with a Fiskars eyelet setter in all four corners as shown in the photo.

5
Set eyelets.

6
The basket gets its shape by gathering all the corners with organza ribbon.
