

Engelen in ballen en kabouters

v11131

Kabouters en engelen in plastic ballen. Decoreer met Foam Clay. Schilder ballen van styropor voor de hoofden en een kegel voor de muts. Geef de engelen wollig haar en vleugels. Lijm een houten knoop aan de onderkant om het figuur te laten staan.

Hoe werkt het

1. Paint the polystyrene balls skin colour and the cones red.

2. Roll small balls of Foam Clay and push them flat on the baubles.

3. Paint or push the Foam Clay onto the wooden buttons which are to be used as feet.

4. Draw facial expressions using a thin pen and red paint.

5. Take the hanger out of the bauble. Push the head down onto the collar and take it out again. Glue the hole before fixing the head.

6. Glue the hanger onto the hat if you want to hang the pixie. Cut pieces of twine for hair and glue it on with the hat. If you want the pixie to stand, glue it onto a wooden button.

7.
When making the angels push the hanger onto the head to mark the holes. Make the holes with the pointy end of the scissors. Now you can push in the hanger with a bit of glue. Part the hair and arrange it so it covers the piece of string. Also thread the organza flower onto the piece of string and glue it in place. If you want the angel to stand, glue it onto a wooden button and cut off the piece of string.

8.
Glue on the wings.
