

## Decoreren met handgemaakt papier

v11685

Deze dozen zijn geverfd met Plus Color acrylverf en bedekt met prachtig handgemaakt papier. Papier is gelijmd met VTR lijm.

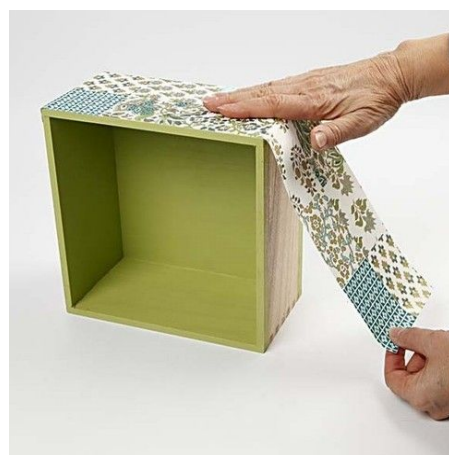

### *Hoe werkt het*

**1**  
Paint the box with Plus Color. This will raise the wood slightly, so sand lightly and paint again to get the best result.

**2**  
Cover the box with paper on areas which are not painted. Cut the paper 2mm less than the measurement as the glue makes the paper expand. Apply a light coating of glue to the box to seal the surface and prevent it from sucking the glue from the paper.

**3**  
Measure the paper and cut it slightly smaller as the glue makes the paper expand. The first piece of paper should go around the corner, the next piece should go exactly to the corner. When cutting, you should try to make the pattern match.

**4**  
For light boxes, glue a Picture Hanger on the back. Otherwise drill them onto the wall.
