

Gevulde harten

v11861

Deze harten geknipt uit Vivi Gade Design papier, zijn langs de randen genaaid met de naaimachine en gevuld met polyester vulling.

Hoe werkt het

1
Draw a heart using the template and cut out – cut two hearts for each hanging decoration.

2
Apply some glue to the arches of the heart, attach the ribbon at the top and glue the hearts together, leaving an opening.

3
When the glue is dry, stuff some polyester stuffing inside and sew around the edge on the sewing machine. □ Use the hearts as decoration for the Christmas tree, as decorations for the window or as a gift wrapping decoration.
