

Servetten decoupage op eieren

v12256

Twee-delige eieren van karton zijn geverfd met Plus Color acryl verf en gedecoreerd met servetten. Vervolgens gedecoreerd met zelfklevende strasstenen in de vorm van halve parels en 3D stickers.

Hoe werkt het

1. Make a hole at the bottom of the egg to fit the metal stand.

2. Paint the bottom half with Plus Color Craft paint.

3. Tear the top layer of a napkin and glue the pieces onto the lid (the top half of the egg) with decoupage lacquer.

4. Glue the straight edges from the napkin along the edge of the lid.

5. Glue self-adhesive rhinestone half-pearls along the edge (cut them off individually first).

6. Place the stand underneath the egg and attach self-adhesive dragonflies.

7. Paint the brown eggs white before decorating with napkin decoupage.

8. You may paint the polystyrene eggs with Plus Color Craft pain.
