

Macramé ketting met kegels en kralen

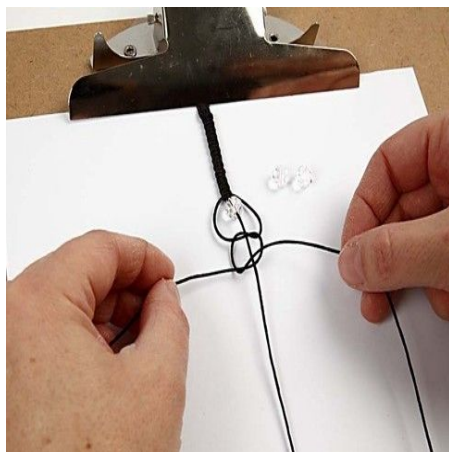

v12249

Deze macramé ketting is gemaakt van enigzins gewaxed zacht katoenkoord met kralen. De hanger is gemaakt van een zilveren kegel en een facette druppelvormige kraal op een nietstift.

Hoe werkt het

1. Cut one piece of thin lightly waxed cotton cord measuring approx. 6m and one piece measuring approx 0.85m. Start as shown, making a double loop for a bead.

2. Braid approx. 70cm, attaching a bead for every braided 3.5 to 4cm. Double the spacing in the middle of the necklace.

3. Finish the necklace by attaching the last bead and tying a knot with all the cords.

4. Make a pendant from a silver cone and glass faceted teardrop shaped bead on a ball head pin.

5. Attach the pendant onto the necklace with an oval jump ring.
