

Sleutelhangers van schoenveters

v12184

Een vet coole sleutelhanger gemaakt van een schoenveter met een metalen hanger.

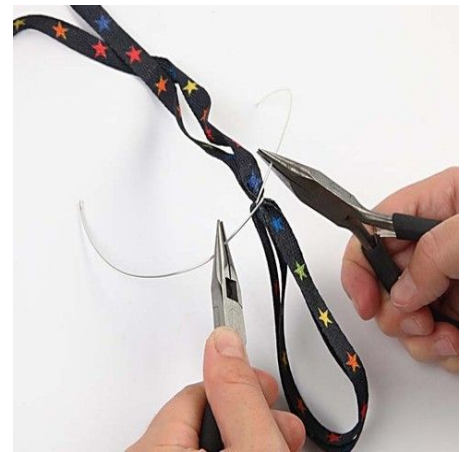

Hoe werkt het

1. Snørebåndet foldes på midten og bukkes ca. 10 cm tilbage.

2. Pull a piece of silver-plated wire through the loop of the lace as shown in the photo.

3. Twist the silver-plated wire around the lace and tighten.

4. Attach a pendant onto the round jump ring onto and attach the round jump ring onto the shoe lace.

5. Start braiding – start where the silver-plated wire is twisted around the shoe lace.

6. Always braid to the same side – i.e. always start with the same lace. This results in a twisted braiding. Finish by tying a knot.
