

Houten spaarvarken

v12180

Schattig houten spaarvarken geverfd met Plus Color acryl verf met heel veel water verdund.

Hoe werkt het

1
Dilute Plus Color with water and massage the paint into the water with a brush. This method ensures that the wood grain is still visible. Use lots of water.

2
Finally varnish the wood articles with an acrylic lacquer as well as the lids for the boxes.
