

Ketting met steenkralen

v12094

Prachtige rode en zalmkleurige steenkralen geregen op kralendraad.
De grote bloemen zijn gemaakt van antiek zilver.

Hoe werkt het

1
Pull the beads onto a beading wire. Connect with a mega flower from antique silver. Feed the wire through the flower and two crimp beads which are then squeezed flat.

2
Continue with the necklace on the other side of the flower using the same technique for closing. Distribute two flowers on the necklace.
