

Zijde verf met fixatie door strijkijzer

v12529

Een ontwerp van een bloem is getekend op deze sjaal van zijde met transparante Gutta. Daarna is de sjaal beschilderd met zijde verf die gefixeerd kan worden met een strijkijzer.

Hoe werkt het

1. Place the silk scarf on a piece of polyester wadding. Draw flowers on the scarf with transparent Gutta directly from the bottle. Take care not to let the Gutta getting stuck onto the polyester wadding during the drying process.

2. Fill in the flowers with paint; i.e. silk paint which must be steam fixed. Do not paint on the lines of transparent Gutta.

3. Paint the rest of the scarf with a larger brush. Vary the painting technique, making sure that no overlapping edges dry out before finishing completely. Make sure to thoroughly rubbing the brush at the overlappings.

4. Let the scarf dry until the following day and fix with an iron, placing a piece of baking paper between the iron and the scarf.

5. Rinse the Gutta in lukewarm water.
