

Spoken van gipsgaas

v12741

Drapeer gipsgaas over een styropor bal op een stok. Verf het spookje met Glow-in-the-Dark verf. Teken de ogen erop met Window Color outliner of 3D outliner.

Hoe werkt het

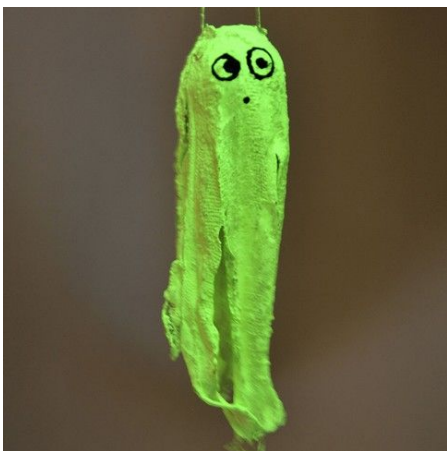

1
Attach a polystyrene ball to the end of a stick. Drape over the plaster gauze. Remember to add a hanging string between the layers. Leave to dry.

2
Paint with Glow-in-the-Dark paint. More coats produce a brighter effect.

3
Draw eyes with a black 3D outliner. A black permanent marker can also be used.

4
An alternative version.

5
