

Neon sleutelhangers van krimpfolie

v13020

De hangers zijn gemaakt van zwart krimpfolie dat gedecoreerd is met Neon Deco textielstiften. Na het krimpen in de oven, wordt de hanger aan de splitring bevestigd met een zwart elastisch koord versierd met neonkralen.

hoe werkt het

1.

Draw a figure on a piece of A6 black shrink plastic foil and cut it out.

2.

Use revolving punch pliers to make holes in the figure. Use the largest possible hole size on the revolving punch pliers and make three or four holes very close to each other, so the hole is sufficiently large after the shrinking!

3.

Place the plastic figure on a piece of baking paper on a baking tray and place it in a pre-heated oven at 160°C for approx. 40 seconds. Open the oven door ajar, and leave the figure in the oven until it unfolds again.

4.

Thread the beads onto the doubled-over piece of elastic cord by using a piece of doubled-over floral wire as a needle. Tie on the figure using a double knot and attach the split ring onto the other end of the elastic cord.
