

Een politiepenning maken

v14094

Deze politiepenning is gemaakt van karton. Een pasfoto van de politieagent in de dop is erop geplakt. Daarna is de penning/ID gelamineerd.

Hoe werkt het

1. Divide a piece of A4 card into eight equally big sections using a ruler and a pencil. Cut out the parts.

2. Draw and write on both sides of the cut out piece of card.

3. Print out a picture and attach it to one side of the cut out piece of card.

4. As this police badge will often be required to be shown when playing, laminate it in the laminating machine to stiffen it and give better durability.
