

## A Mobile made from Card Discs with Swivels

This mobile is made from heavy card discs in three sizes, decorated with marker pens and glazed paper. They are connected with swivels, so that each disc can rotate in light air currents independently of each other.

Inspiration: 13867

**1.**

Use a card disc as a template for copying onto a piece of patterned glazed paper. Make two in different designs; one for each side of the card disc.

**2.**

Glue the cut-out glazed paper circles onto each side of the card disc as a base for further cut-outs according to your imagination.

**3.**

Use your imagination and combine cut-outs with drawings made with Colortime markers on one or more of the card discs for the mobile.

**4.**

Connect the decorated card discs in the holes with the swivels supplied with this range.
