

## Decoupage op plastic

Ondergronden van plastic kunnen heel goed gedecoreerd worden met transparant decoupage en tissue papier. Gebruik decoupage lijmlak gloss, mat of met glitter om de stukjes papier op het voorwerp te lijmen.

**Inspiration: 15100**

**1**

Decoupage with transparent paper: Tear the paper into small oblong pieces (have plenty ready before beginning the decoupage). Apply decoupage lacquer with a brush. Attach a small piece of paper on top and smooth with the brush from the middle and outwards to remove air bubbles and creases. Repeat and leave to dry.

**2**

Our two-piece plastic products have the advantage that they may be decorated on the inside which results in a super glossy outer surface when assembled and dry. Both halves of the plastic item may be placed on the table whilst painting, making the painting and drying processes easier.
