

Verven op hout

v15076

Houten ondergronden zijn ideaal om te decoreren met Plus Color Acrylverf die een uitstekende dekking heeft. Breng Plus Color hobbyverf aan met een penseel en voeg lijnen en fijne details toe met Plus Color Markers.

Hoe werkt het

1

Paint with Plus Color craft paint and leave to dry completely. NB: some wooden products have a very absorbent surface – therefore, it may be an advantage to apply two coats of paint for a smooth and sealed surface prior to decorating with markers.

2

Draw with Plus Color markers when the surface has dried completely. The pump action paint markers work by gently pressing the drawing tip up and down a couple of times to make the paint flow to the felt tip. The marker is now ready for use. Shake the marker as you go along for a uniform colour. Leave to dry.
