

Cadeaus inpakken met bloemen

v15310

De cadeaus zijn gedecoreerd met design kegels, bloemen van tissuepapier en uitgestanste bloemen op bonsaidraad.

Hoe werkt het

1
Wrap the presents in wrapping paper and tie cotton cord around them. Attach the punched-out decorative card flowers onto the ends of the twine with Dodz adhesive dots.

2
Cut pieces of tissue paper measuring approx. 6 x 10 cm. You will need 5-10 layers depending on how compact you want the flower to be. Fold the tissue paper in a concertina fashion and tie bonsai wire around it as illustrated in the photo. Now pull the layers of tissue paper – one by one – towards the middle of the flower, so that it is unfolded when all the layers of tissue paper are separated.

3
Cut a 10 x 10 cm piece of design paper. Fold it into a cone and secure it with a Dodz adhesive dot. Attach a punched-out card flower onto the rolled up end of a piece of bonsai wire with Dodz adhesive dots

4

Fill the cone with bonsai wires with punched-out card flowers and tissue paper flowers attached to one end of the bonsai wire. Attach the filled cone onto the present using a glue gun.
